Amarra Symphony 3.0 Read Me Overview

The following guide provides important information regarding your Amarra software. Note that, when used, the term ‘Amarra’ applies to both Amarra and Amarra Symphony. It will be indicated if a topic only applies to Amarra or Amarra Symphony.

Thank you for downloading the new release of Amarra or Amarra Symphony with iRC version 3.0. Please read this document before installing and running your Amarra software, it contains important information about the installation and operation of your application.

Enjoy the music!

NOTE: Translation to local language is available via google translate now. Please visit http://translate.google.com/?tr=f&hl=en and set the appropriate ‘Translate to’ language. Browse to your Amarra product folder in your Applications folder in Finder and select the appropriate file to translate. This file is called ‘Amarra Symphony Read Me’.

Chapter 1.0 ........................................ System Requirements

Amarra software requires the following:

Computer:
- Late model Intel–based Mac - PPC / G5 is not supported.
- 1024 x 768 pixel or larger display
- RAM: 4 GB minimum, 8 GB or more preferred
- Output Device/DAC: Core Audio Interface (Built-in, Optical, USB, FireWire, Thunderbolt, HDMI)

Supported Audio Hardware DACs (Digital/Analog Converter):
- Most USB, FireWire and Thunderbolt interfaces work well and are recommended for best performance.
- The built-in Audio (optical/digital/toslink) is not recommended but will work with Amarra and have limited sample rate support up to 96kHz. Please note some pre-mid-2010 Macs do not support 88.2kHz sample rates.

Software:
- Mac OS X 10.6.8 and above
- Amarra
- iTunes 11.0 and above

![Light Bulb Icon] NOTE: A network connection is required to authorize your software.

As for choice of computers, Intel based Macs are great. Install 4 GB RAM at a minimum, 8 GB of RAM or more is preferred.

For the computer, in order of preference we can recommend the following:
- Intel Mac Mini
- Intel MacBook, MacBook Pro
- Intel Mac Tower
- Intel iMac
- Intel MacBook Air - recommended only if configured with 8 of RAM and 256 GB Flash Storage
NOTE: Any Amarra License will activate two (2) computers concurrently.

NOTE: Please read the Amarra/Amarra Symphony Activation Guide for detailed information on Activating your software and managing your licenses using the License Control Panel.
Chapter 2.0 ...................................................... Evaluation Mode

Evaluating an Amarra product has never been easier. Just launch Symphony and select the Evaluate button to access the full-feature, 15-day evaluation version (Figure 1 below). No Email address is required.

![Figure 1](image)

**NOTE:** Amarra 3.0 requires a new license and with that comes the ability for everyone to trial Amarra, even if you’ve done a trial in the past. Once you’ve done a trial, if you need to have it extended, please write support@sonicstudio.com. We can assist with a second evaluation.

**NOTE:** Please read the Amarra/Amarra Symphony Activation Guide for detailed information on Activating your software and managing your licenses using the License Control Panel.
Chapter 3.0..........................Activating Amarra Software

Amarra licensing is granted using software DNA from softWORKZ. Refer to the Amarra Activation Guide for more information on licensing your copy of Amarra.

Not Sure Which Amarra Product You Own? Use the Find Your Amarra App page.

Can’t find your Activation Code? Get Your Activation Code Here

3.1 Activating Amarra with your Activation Code

When you purchase your Amarra product, you will be given a unique activation code. This activation code will be used to permanently enable Symphony to run on your computer. In addition, you’ll be given an account code and password to activate Sonic Studio iRC.

Please read the Amarra Activation Guide, located in your Amarra or Amarra Symphony Application folder, for step-by-step instructions for activating your copy of Amarra Symphony and Sonic Studio iRC.

Chapter 5.0 .................................................. Software Updates

The Amarra Symphony Preference “Check for Updates” is set by default and will provide notification on launch when a new version of Symphony is available. As an alternative, you can use the “Check For Updates” command, available from the Amarra Symphony->File pulldown menu, to check for any new updates.

Updates to Amarra Symphony when available, can be found in the Downloads section of the Amarra website:

http://www.sonicstudio.com/amarra/amarra_support#DOWNLOAD
Chapter 6.0 .......................... Software Change Information

3.0.3 Changes (build 4559) Release

• Removed Sonic Studio Process - replaced with realtime down sampling
• Modified ‘I’ button to open Audio Device Preferences window
• Updated User Interface
• Bug Fixes and performance enhancements
• New installation process and scripts for OS Optimization
• Fixed Purge OSX Inactive Memory command
• Updated Team Support application to current release

Changes to previous releases can be found on our website at www.sonicstudio.com.
Chapter 7.0...................................................... Known Issues

Please refer to your documentation or visit our FAQ at www.sonicstudio.com/amarra/amarrafaq.html for a complete list of known issues and workarounds.

- Amarra can not play “psuedo”-files in iTunes created by other players (i.e. Pure Music flac alias files).

- Some MP3 files may display an incorrect rate in a Playlist.

- Some network drives may not work well with Amarra, the DroboShare is one example.

- Files with “:” or quotes ‘“’ may not play.

- Apple Lossless
  - Earlier versions of Apple Lossless files may not play
  - Apple Lossless created in Max and xld may not play correctly

- Note: Converting to AIFF and back to ALAC using iTunes is a work around.

- Very large iTunes libraries (> 30,000 tracks) may have problems with skipping tracks.

- There is a small issue in Amarra that may require the application be rebooted when left running for few days.
